## Christmas Bonus

John Rich, Winchester's wealthiest citizen, has given five of his household employees a cash Christmas bonus. From the clues below, can you determine each employee's job and the amount received?

- 1. Guess received twice the amount that the butler received.
- 2. The cook was given \$500 more than Ellis and \$1,500 more than Harris.
- 3. Ellis received half the amount that the secretary received.
- 4. Childs' gift was twice that which Franks received.
- 5. The gardener received more than the chauffeur who did not receive the least and \$1,500 more than the maid.
- 6. Franks was given one-third what the cook was given.

The chart below is for your convenience in solving the logic problem. Enter information obtained from the clues, using an X to indicate a definite "NO" and an O to indicate a "YES".

	BUTLER	COOK	GARDENER	CHAUFFEUR	MAID	SECRETARY	\$1,000	<mark>\$1,500</mark>	\$2,000	<b>\$2,500</b>	\$3,000	\$5,000
