

One2Nine

by Rodulfo Kurchan & Esteban Grinbank in GAMES

In the puzzles on the next page, you are to arrange the names of the numbers from ONE to NINE within the 6x6 grid, one letter per square, so that all the squares are filled.

Here are the rules:

The words do not cross.

When all the words are arranged, no squares remain empty.

Words are always written in a straight line and in consecutive squares, from left to right and top to bottom.

PUZZLE 1

S					
			W		
				N	
	E			V	
				H
